Novelty (N)	Claims Claims	1-11	YES NO
Inventive step (IS)	Claims Claims	1-11	YES NO
Industrial applicability (IA)	Claims Claims	1-11	YES NO

2. Citations and explanations (Rule 70.7)

This report is based on the claims as originally filed.

Documents cited in the International Search Report:

- 1. EP 0520489 A2
- 2. US 4513385 A
- 3. US 6178140 B1
- 4. Hodjat, F. et al "Nonuniformly spaced linear and planar array antennas for sidelobe reduction", Antennas and Propagation, IEEE Transactions, Pages 198-204, vol. 26, No. 2, March 1978.

The cited documents represent the general state of the art.

The invention defined in claims 1-11 is not disclosed by any of these documents.

The cited prior art does not give any indication that would lead a person skilled in the art to the claimed method for enhancing the ratio between the main lobe and grating lobes in an antenna array. Therefore, the claimed invention is not obvious to a person skilled in the art.

Accordingly, the invention defined in claims 1-11 is novel and is considered to involve an inventive step. The invention is industrially applicable.
